Summary

Software Engineer with nearly three years of experience in embedded systems and Android platform development. Previously worked as a Mobile Application Developer, building cross-platform applications with React Native and TypeScript. Technical experience spans application, framework, system, kernel, and hardware-integration layers using C/C++, Kotlin, AOSP, and Linux. Strengths include platform migration, hardware bring-up, power and boot optimization, and systematic root-cause analysis.

Experience

Motorola Solutions Sdn. Bhd. | Malaysia

Software Engineer

Jan 2024 – Present

- Promoted from Graduate Trainee to Software Engineer two months ahead of schedule following strong program performance.
- Develop and enhance Android platform features across application, framework, system, and kernel layers using Kotlin and C/C++, including time and date services, GPIO translation, and OneWire UART kernel integration.
- Executed a major Android OS migration spanning four versions from Android 12 to Android 16 to support the integration of next generation hardware chipsets and ensure full software compatibility.
- Optimized system boot time and power consumption through systematic root-cause analysis and close collaboration with hardware engineers.
- Supported embedded hardware bring-up and low-level development, implementing drivers, hardware interrupts, and data compression and decompression algorithms.
- Developed C/C++ audio-processing capabilities, including a Software AI Noise Suppressor (SW AINS), to improve voice clarity and product audio performance.
- Diagnose complex issues across Android, Linux, and embedded stacks, partnering with hardware and QA teams through resolution.

Euro Potential Sdn. Bhd. | Malaysia

Mobile Application Developer & Intern

Oct 2022 - Dec 2023

- Developed and tested cross-platform mobile applications using React Native and TypeScript, delivers assigned features and supports project completion.
- Managed MongoDB and Firebase data operations to support efficient application storage and retrieval.
- Collaborated with the development team to diagnose and resolve critical issues while presenting progress and technical findings during stakeholder meetings.
- Recognized for strong performance and invited by the supervisor to continue contributing as a part-time developer.

Education

Universiti Sains Malaysia | Malaysia

Master of Computer Science

Sep 2025 – Present

CGPA: 3.73/4.00

Universiti Tunku Abdul Rahman | Malaysia

Bachelor of Computer Science (Honours)

Oct 2020 - Oct 2023

CGPA: 3.7903/4.00 | Honours Degree with Distinction | President's List (3x) | Dean's List (4x)

Technical Skill

Programming: C++, C, JavaScript, TypeScript, Python, Java, Kotlin, C#

Platforms & systems: Linux, embedded systems, Android, AOSP,

Mobile & data: React Native, MongoDB, Firebase, SQL

Cloud & collaboration: AWS Cloud, GitHub

Source control: Git

Soft Skill

Systematic debugging, analytical problem-solving, adaptability, cross-functional collaboration, rapid learning, and technical communication.

Activities & Volunteer Experiences

- Organized Corporate Social Responsibility (CSR) events for the department.
- Served as the department's Buddy Program Champion, leading program activities and supporting participant engagement.

Language

Chinese, English, Malay, Hokkien, Cantonese
