Summary

Software Engineer with nearly three years of experience in embedded systems development and Android Platform, complemented by earlier mobile application development experience. Experienced across application, framework, system, kernel, and hardware-abstraction layers using C/C++, Kotlin, AOSP, Linux, React Native, and TypeScript. Strengths include platform migration, hardware bring-up, power and boot optimization, and systematic root-cause analysis.

Experience

Motorola Solutions Sdn. Bhd. | Malaysia

Software Engineer

Jan 2024 – Present

- Earned promotion from Graduate Trainee to Software Engineer two months ahead of schedule through strong program performance.
- Develop and enhance Android platform features across application, framework, system, and kernel layers using Kotlin and C/C++, including time and date services, GPIO translation, and OneWire UART kernel integration.
- Executed a major Android OS migration spanning four versions from Android 12 to Android 16 to support the integration of next generation hardware chipsets and ensure full software compatibility.
- Improved system boot performance and reduced power consumption through root-cause analysis and collaboration with hardware engineers.
- Supported embedded hardware bring-up and low-level development, implementing drivers, hardware interrupts, and data compression and decompression algorithms.
- Developed C/C++ audio-processing capabilities, including a Software AI Noise Suppressor (SW AINS), to improve voice clarity and product audio performance.
- Diagnosed and resolved complex issues across Android, Linux, and embedded systems alongside hardware and QA teams.

Euro Potential Sdn. Bhd. | Malaysia

Mobile Application Developer & Intern

Oct 2022 - Dec 2023

- Developed and tested cross-platform mobile applications using React Native and TypeScript, delivers assigned features and supports project completion.
- Managed MongoDB and Firebase data operations to support efficient application storage and retrieval.
- Collaborated with the development team to diagnose and resolve critical issues while presenting progress and technical findings during stakeholder meetings.
- Earned an invitation to continue as a part-time developer based on strong performance.

Education

Universiti Sains Malaysia | Malaysia

Master of Computer Science

Sep 2025 – Present

CGPA: 3.7300/4.00

Universiti Tunku Abdul Rahman | Malaysia

Bachelor of Computer Science (Honours)

Oct 2020 - Oct 2023

CGPA: 3.7903/4.00 | Honours Degree with Distinction | President's List (3x) | Dean's List (4x)

Technical Skill

Programming: C++, C, JavaScript, TypeScript, Python, Java, Kotlin, C#

Platforms & systems: Linux, embedded systems, Android, AOSP,

Mobile & data: React Native, MongoDB, Firebase, SQL

Cloud & collaboration: AWS Cloud, GitHub

Source control: Git

Soft Skill

Systematic debugging, analytical problem-solving, adaptability, cross-functional collaboration, rapid learning, and technical communication.

Activities & Volunteer Experiences

- Organized Corporate Social Responsibility (CSR) events for the department.
- Served as the department's Buddy Program Champion, leading program activities and supporting participant engagement.

Language

Chinese, English, Malay, Hokkien, Cantonese
